ENGLISH FOR MEDICAL PURPOSES

Learning English is essential for medical professionals and necessary for their training and upcoming medical careers, because all medical information for medical professionals is available in English language and most international conferences and congresses are presented in English. English language is necessary for medical professionals as most of information present in books, articles, documents and journals are in English language.

English for medical purpose (EMP) became essential. EMP is a kind of English for specific purpose ESP which is important for academic and professional needs of medical students. Some scholars noticed that English has got an unquestionable status in medical settings of Algerian. There are several reasons for medical professionals to learn medical English as it has gained nowadays the status of Lingua Franca. There are many academic and professional settings relying on English as far as Algerian medical situation is concerned.

The courses have a strong practical focus making trainees develop a sufficient confidence and English language skills to participate internationally.

If you are working on a research project, preparing a dissertation, a presentation, or writing a scientific paper, you can get personalized professional assistance and guidance.

Throughout the courses, you learn essential specialist healthcare English and communication skills with accuracy and confidence.

At the end of the training, you should be able to:

- Understand a given speech in English, read, comprehend and analyze any article in your field.
- Explore scientific articles relating to different specialties of medicine;
- Prepare presentations specific to the field;
